TORQUEEDO

- + Lightest outboards in their power class, from 15.5 to 17.3 kg complete
- + Highest overall efficiency
- + Quietest electric outboard
- + Most dynamic motor response
- + Onboard computer with GPS, remaining range, charge status and additional functions
- + Easy handling, fast battery swaps, simple to transport

The freedom to Travel — powerfully, efficiently and quiet

Travel motors have been delighting boaters with their outstanding efficiency, useful technology and easy-to-use design for more than 15 years. The Travel 1103 motors are the lightest, quietest outboards in their respective power classes and come with a high-performance lithium-ion battery and a built-in onboard computer with GPS, remaining range and charge status. Travel motors boast a durable direct-drive motor, industrially engineered to provide superior efficiency and the most dynamic motor response. The Travel 1103 comes with a high-capacity 915 Wh battery but is still easy to handle at just 17.3 kg complete.

High performance, speed and range

Dependent on factors such as type of boat, load, propeller and ambient conditions. Figures for speed and range are indicative only and are not a guarantee of performance.

i What's inside your battery

Battery cell type might be the most important factor when selecting an electric outboard. Travel batteries use high-quality, individually welded, cylindrical steel safety cells equipped with multiple safety mechanisms made by the world's most reputable manufacturers. The battery is further protected with a built-in battery management system with redundant hardware backups for every safety-relevant function. Other cell types, such as inexpensive pouch cells, are susceptible to damage from heat, vibration and the repeated shocks common on boats. Consumer-grade pouch cells also offer less effective protection against short-circuiting and have a shorter overall service life.

Travel in Style

Like all products from Torqeedo, Travel motors are offered with a full suite of high-tech accessories. It's easy to add a spare battery or a remote throttle for operating the motor from the helm instead of the tiller, or choose the TorqTrac smartphone app. With the optional Bluetooth dongle installed, TorqTrac turns your compatible smartphone into a bright, easy-to-read onboard computer with a number of useful motor and battery readouts. The app is available from the App Store for iPhones and Apple products, and on Google Play Store for Android devices.

Technical data

	Travel 1103 C
Input power in W	1,100
Propulsive power in W	540
Comparable petrol outboard (shaft power)	3 HP
Comparable petrol outboard (thrust)	4 HP
Maximum overall efficiency in %	49
Static thrust in lbs*	70
Integrated battery (Li-Ion) in Wh	915
Nominal voltage in V	29.6
Final charging voltage in V	33.6
Total weight in kg	17.3 (S) / 17.7 (L)
Motor weight without battery, in kg	11.3 (S) / 11.7 (L)
Weight of integrated battery, in kg	6.0
Shaft length in cm	62.5 (S) / 75 (L)

* To compare Torqeedo static thrust data with conventional trolling motors, add approximately 50% to the Torqeedo static thrust values.
